Art and Design
Castle College. 2008

Further Professional Development

I wish to build upon my skill set at home and in a professional setting. Learning more about technology and human interaction. I have a particular interest in accessibility and usability.

About Me

I am working on many personal projects across a range of media such as creative writing, game design and prop making. The creative process is important to me regardless of the materials used. I also enjoy to read comics, playing tabletop games, watching films and skateboarding badly.

Professional Skills

Front end:

`HTML 5` `CSS 3` `SASS` `JavaScript` `JQuery` `Bootstrap` `Flexbox`

Work Flow:

`Illustrator` `Photoshop` `InDesign` `Git` `Atom` `Mac` `Windows` `Slack` `Sketch` `Adobe XD`

Experience

Digital Conversion
Excel Digital
February 2017 - present
My work at Excel Digital involves using HTML, CSS and JavaScript, taking PDF documents from educational text and creating web pages for an online learning environment. The work is fast paced whilst assuring the content remains accurate and well presented.

Volunteer / Team member
Wellington Rabbit Rescue
June 2016 - present
I created a range of digital work for WRR including our website and various graphics. I have also worked directly with the animals and public to promote animal welfare.

Produce Assistant / Supervisor
Pak'n'save
November 2009 - January 2016
In this role I was responsible for time management of myself and others as well as keeping a fast work-flow to meet the needs of my co-workers and costumers. I dealt with assisting a wide range of customers with individual needs on a daily basis. I was the departments health and safety rep between 2011 and 2013, in role I was also responsible for risk assessment and accident investigation to help maintain the safety of staff and customers.

IT Mentor
NorthTec
March 2009 – November 2009
Providing fellow students with assistance and advice on a range of user related topics. I often helped people with little or no computing experience. This meant assessing the problem and using simple non-technical language to help.
